FOLLOW THESE SIMPLE SAFETY STEPS TO STAY SAFE IN YOUR HOME.

1

Never store or use flammables in the same room as a gas appliance. Keep the area around your appliances clean and free of materials that burn easily.

2

Keep all vents leading out of your house clean and clear of obstructions. Make sure that heater and dryer filters are changed regularly.

3

Never cover your floor furnace with a rug or anything else that can catch fire.

4

Never use your oven or stove to heat the room.

5

Install and use all your gas appliances according to the manufacturer's instructions.

6

Have your appliances cleaned and checked at least once a year.

7

If you smell gas, leave the building immediately and tell others to leave, too. Do not smoke, strike a match or switch anything on or off. Do not use the telephone. Call Atmos Energy or 911 as quickly as possible from a neighbor's phone.
